Developer Tool: VS Code, Git, Click Up, GoHighLevel, Atom, Eclipse, Agile Methodology, and Docker

Professional Experience

Back-End Intern - *OptoGrow Operations Management Solution*   **March 18, 2024 - June 21, 2024**

- Developed and maintained an automated system for scheduling appointments and sending reminders via email and text, improving client engagement and reducing missed meetings.
- Successfully implemented and managed forms and surveys to efficiently gather user data.
- Conducted thorough testing of websites, emails, SMS, calendars, and maintained high standards of quality control.
- Create a website, forms, surveys and calendar

Work Immersion - *Creotec Philippines, Inc.*   **December 2019**

Projects Experience

Automated Question Paper Generator

- This project is a web application developed using PHP with Object-Oriented Programming (OOP) and MySQL database. It assists faculties, teachers, and mentors in generating question papers for their classes. The system allows users to store questions at any time and randomly generates a question paper when needed.

Burger Website

- This project is a burger website with CRUD (Create, Read, Update, Delete) functionality. Users can browse the menu, customize their burgers, and add them to a virtual cart, similar to online shopping. The website allows users to manage their orders, view their selections, and proceed to checkout seamlessly.

Educational Background

Cavite State University - Silang Campus   **2020 - 2024**
Bachelor of Scince in Information Technology

Philippine Christian University - Dasmariñas   **2018 - 2020**
Computer System Servicing

Professional Summary

Performance-driven strategic thinker who possesses excellent decision-making skills, initiative, and creativity. Eager to learn new technologies and techniques to provide solutions to improve customer experience.
